LA CONSOLACION COLLEGE BACOLOD
School of Sciences, Liberal Arts, and Teacher Education

ENG 110 (Introduction to Linguistics)
Final Examination

/80

Name:_____ Date:_____
Year/Course:_____
Important: *"LCCIans choose to be honest even others are not, even others cannot and even others will not."*

General Instructions: Read and analyze each question carefully. Shade the letter which corresponds to your answer. Use only a PENCIL in shading.

I. Vowels

1. Which of the following is a vowel sound?
   A. /t/ B. /b/ C. /a/ D. /s/
2. Vowels are produced with _____.
   A. complete blockage of airflow C. an open vocal tract
   B. friction in the mouth D. a closed vocal tract
3. Which group consists ONLY of vowel letters?
   A. b, c, d, f, g C. p, t, k, s, h
   B. a, e, i, o, u D. r, l, m, n, y
4. Vowels can be described by tongue height, advancement, and _____.
   A. voicing B. stress C. lip rounding D. pitch
5. Which is a high vowel?
   A. /ɑ/ as in father C. /i/ as in see
   B. /a/ as in cat D. /e/ as in bed
6. Which is an example of a back vowel?
   A. /i/ B. /e/ C. /æ/ D. /u/
7. A monophthong is _____.
   A. a vowel with two sounds C. a consonant blend
   B. a vowel with three sounds D. a single steady vowel sound
8. A diphthong involves _____.
   A. two vowel sounds gliding together C. no movement of the tongue
   B. three vowel sounds D. a consonant + vowel combination
9. A rhotic vowel includes which sound?
   A. /s/ B. /f/ C. /r/ D. /t/
10. Which vowel is tense?
    A. /i/ as in sheep C. /ɪ/ as in sit
    B. /e/ as in pen D. /ʊ/ as in foot
11. If the word ends in an unvoiced sound like /t/, the vowel before it will sound _____.
    A. longer B. shorter C. louder D. higher pitched
12. Based on vowel lengthening rules, which pair shows a LONGER vowel sound?
    A. pick – pig B. bet – bed C. cap – cab D. lock – log
13. Which pair BEST shows the difference between rounded and unrounded vowels?
    A. sheep – ship B. too – see C. bit – bet D. cat – cut
14. In the pair look vs. Luke, the difference is mainly in _____.
    A. tongue height C. presence of consonant clusters
    B. tongue advancement D. vowel length and rounding
15. Which word likely contains a diphthong?
    A. sit B. cat C. coin D. bed

16. A student says “fear” without sliding the vowel sound. What mistake is most likely?
A. turning a diphthong into a monophthong
B. adding an extra consonant
C. removing the rhotic sound
D. shifting stress to another syllable

17. The difference between fire (/faɪər/) and far (/far/) is mainly due to _____.
A. presence of a triphthong
B. consonant change
C. syllable count
D. stress difference

18. If a student pronounces ball and bulk almost the same, which concept needs review?
A. diphthongs B. vowel quality C. rhotic vowels D. consonant voicing

19. A teacher asks students to sort words by tongue height (high, mid, low). What skill is being used?
A. remembering B. understanding C. analyzing D. evaluating

20. Which task BEST assesses understanding of monophthongs, diphthongs, and triphthongs?
A. Matching terms to definitions
B. Copying vowel charts
C. Reading a paragraph aloud
D. Listening to words and classifying the vowel type

II. Consonants

21. Which describes voicing?
A. Where the sound is produced
B. Whether the vocal cords vibrate
C. How air escapes
D. Whether the sound is nasal

22. The consonants /p/, /b/, and /m/ are all _____.
A. Labiodental B. Alveolar C. Bilabial D. Palatal

23. Which consonants are voiceless?
A. /b/, /d/, /g/ B. /m/, /n/, /ŋ/ C. /v/, /z/, /ʒ/ D. /p/, /t/, /k/

24. /tʃ/ (“ch”) is classified as a(n) _____.
A. Fricative B. Plosive C. Affricate D. Nasal

25. Which sound is a nasal?
A. /f/ B. /m/ C. /z/ D. /l/

26. /f/ and /v/ share the same _____.
A. Manner B. Voicing C. Place of articulation D. All of the above

27. Which is a sibilant?
A. /l/ B. /w/ C. /h/ D. /s/

28. A sound like /t/ that blocks airflow completely and then releases is called _____.
A. Fricative B. Affricate C. Plosive D. Glide

29. Which of the following is a sonorant?
A. /l/ B. /s/ C. /t/ D. /ʃ/

30. All English consonants are considered _____ because they use air from the lungs.
A. Non-pulmonic B. Pulmonic C. Glottalic D. Velaric

31. A student produces /s/ and /z/. You ask them to feel their throat. What feature are you helping them analyze?
A. Manner B. Voicing C. Place D. Aspiration

32. If a learner confuses /tʃ/ (“ch”) with /ʃ/ (“sh”), which concept needs reinforcement?
A. Sonorants vs. obstruents
B. Place of articulation
C. Stops vs. continuants
D. Affricate vs. fricative distinction

33. Which pair BEST shows the difference between a stop and a continuant?
A. /b/ – /m/ B. /p/ – /s/ C. /f/ – /v/ D. /tʃ/ – /dʒ/

34. A student says “better” with a clear /t/ instead of a flap. This shows lack of awareness of _____.
A. Voicing
B. Vowel height
C. Additional features of English consonants
D. Place of articulation

35. If /p/ becomes aspirated /pʰ/ in “pin,” this demonstrates _____.
A. Bilabial articulation
B. Vowel lengthening
C. Manner of articulation
D. A burst of air after release

36. A learner mispronounces /θ/ (“thin”) as /t/. What changed?
A. Voicing only B. Place only C. Manner only D. Place and manner

37. If a student groups /m/, /n/, and /ŋ/ together, what reasoning skill are they using?

A. Evaluating C. Categorizing by manner (Analyzing)
B. Remembering D. Predicting outcomes

38. A teacher asks students to sort consonant sounds into obstruents and sonorants. This activity mainly practices:
A. Understanding B. Applying C. Analyzing D. Remembering

39. If a student substitutes /l/ for /r/ in words, the issue likely involves _____.
A. Rhotic vs. non-rhotic articulation C. Aspiration
B. Voicing contrast D. Nasalization

40. A student wants to create a chart showing how air flows in plosives, fricatives, and affricates. This demonstrates _____.
A. Creating B. Remembering C. Understanding D. Applying

III. Suprasegmentals

41. Suprasegmentals refer to features of speech such as _____.
A. vowels and consonants C. loudness only
B. rhythm, pitch, and stress D. mouth movements

42. Stress means giving emphasis by making a syllable _____.
A. shorter and softer C. lower in pitch
B. longer, louder, or higher in pitch D. whispered

43. Which word shows a change in meaning based on stress?
A. teacher B. lovely C. window D. present

44. In words ending in -ic, -tion, and -sion, primary stress usually falls on the _____.
A. first syllable B. last syllable C. second syllable D. second-to-the-last syllable

45. Pitch refers to _____.
A. the highness or lowness of the voice C. the length of a vowel
B. the speed of talking D. the shape of lips

46. Falling intonation is usually used in _____.
A. yes/no questions C. greetings
B. wh- questions and statements D. commands requiring action

47. A rising juncture (//) is used in _____.
A. yes/no questions C. ending sentences
B. giving commands D. showing surprise

48. The symbol (#) indicates _____.
A. a rising tone C. a complete stop
B. a sustained pause D. a question word

49. In the sentence "I CAN'T do it," the capitalized word receives _____.
A. tonic stress C. contrastive stress
B. content word stress D. emphatic stress

50. Extra high pitch (4) is commonly used to express _____.
A. uncertainty B. politeness C. excitement or surprise D. listing items

51. A student says: "SHE's gone?" with rising pitch. What emotion is being expressed?
A. finality B. surprise or uncertainty C. boredom D. anger

52. In the phrase "break UP," the stress is placed on the second word because it is a _____.
A. compound noun B. phrasal noun C. phrasal verb D. proper noun

53. In the compound noun "BLACKboard," the stress falls on "BLACK." What does this show?
A. phrasal stress B. lexical stress C. intonation pattern D. compound word rule

54. "Do you WANT coffee or tea?" uses a rise-fall intonation because the speaker is _____.
A. stating a command B. expressing contrast or choice C. whispering D. expressing politeness

55. If a student reads "Ava, sleep early." without a rising juncture after the name, what happens?
A. The addressee becomes unclear. C. It becomes grammatically incorrect.
B. It becomes a yes/no question. D. The stress rule changes.

56. In the sentence "I LIKE him," stressing "LIKE" creates _____.
A. emphatic stress B. tonic stress C. contrastive stress D. lexical stress

57. Which sentence uses falling intonation correctly?
A. “Are you COMing?” C. “You’re COMing?”
B. “He’s here?” D. “Where are you GOing?”
58. If a student misplaces the stress in ‘ac-CEPT’ and says ‘AC-cept,’ the mistake is in identifying _____.
A. word class B. suffix-based stress C. stress in two-syllable verbs D. tone group
59. Which situation requires fall-rise intonation?
A. speaking politely or showing uncertainty C. stating a fact
B. giving a command D. asking a direct question
60. A teacher asks students to add juncture symbols to change meanings. This develops _____.
A. remembering B. classifying C. copying skills D. analyzing meaning in utterances

IV. Morphological Process

1. What do affixes attach to in order to form new words?
A. Morphemes B. Stems or roots C. Sentences D. Phrases
2. The affix in the word “unteachable” is an example of a _____.
A. Prefix and suffix B. Circumfix only C. Infix D. Reduplicated form
3. Which prefix means “again, repeatedly”?
A. re- B. mis- C. dis- D. ultra-
4. The suffix -ology means _____.
A. Skill B. State C. Study or science D. Lack of
5. Which of the following is an example of an infix in Tagalog?
A. -um- B. -ly C. -hood D. un-
6. The word “calf → calves” demonstrates _____.
A. Reduplication B. Modification C. Circumfixation D. Compounding
7. The pair knife–knives illustrates _____.
A. Vowel modification B. Consonant modification C. Reduplication D. Circumfixation
8. Reduplication involving repeating the whole word is called _____.
A. Rhyming B. Simulfix C. Ablaut D. Repetition
9. Which set shows ablaut reduplication?
A. bye-bye B. lovey-dovey C. tick-tock D. hocus-pocus
10. “Passerby → passersby” is an example of _____.
A. Infix B. Circumfix C. Infixation in English plurals D. Reduplication
11. Which of the following words BEST demonstrates derivational affixation?
A. Walk → walked B. Teach → teacher C. Run → running D. Foot → feet
12. You encounter the new word “hyperfocused.” Based on your knowledge of prefixes, what does the word most likely mean?
A. Focused too much B. Focused a little C. Focused in the past D. Focused together
13. Some English plurals use vowel changes, such as “tooth → teeth.” Which morphological process best explains this?
A. Consonant modification C. Vowel modification
B. Reduplication D. Compounding
14. Which word likely contains a circumfix, based on its structure?
A. Empower B. Enlighten C. Enable D. Unhappy
15. If “lovey-dovey” is formed through rhyming reduplication, which of the following would be its closest structural match?
A. teeny-weeny B. knock-knock C. flip-flop D. ping-pong
16. A student argues that overcook and undercook both use prefixes but have opposite meanings. What is the BEST evaluation?
A. The student is wrong; both mean “cooked perfectly.”
B. The prefixes show tense change.
C. The prefixes show plurality.
D. The prefixes show degree of intensity or amount.

17. Which analysis correctly identifies a morphological process?
    A. “Redo” uses a suffix to indicate repetition.
    B. “Walkie-talkie” uses ablaut reduplication.
    C. “Runner-up → runners-up” demonstrates infixation within compounds.
    D. “Careful” uses the prefix -ful.
18. If “tick-tock” shows ablaut reduplication, what feature identifies it?
    A. Rhyming consonants C. Vowel alternation
    B. Identical meaning D. Same word repeated
19. The pair ascend–ascent shows what kind of morphological change?
    A. Vowel modification B. Consonant modification C. Reduplication D. Ablaut
20. You need to transform the word “joy” into a form meaning “full of joy.” Which suffix is most appropriate?
    A. -ful B. -ly C. -ness D. -hood
