MOCK BOARD EXAMINATION

INDEXING AND ABSTRACTING

Name: _____Date: _____Score: _____

Multiple Choice: Encircle the letter of the correct answer.

1. What is the primary purpose of indexing in information organization?

a. To provide a summary of the content
b. To help users locate information quickly and efficiently
c. To showcase the author's expertise
d. To ensure the document's formatting is consistent

2. Which type of index uses a controlled vocabulary to organize and retrieve information?
a. Alphabetical index
b. Natural language index
c. Keyword index
d. Subject index

3. Which type of abstract is more common in the scientific and technical literature, providing an overview of the research's purpose, methods, and results?
a. Indicative abstract
b. Informative abstract
c. Descriptive abstract
d. Critical abstract

4. Which type of indexing approach uses the author's words as index terms, often with the help of keyword extraction techniques?
a. Natural language indexing
b. Keyword indexing
c. Controlled vocabulary indexing
d. Hierarchical indexing

5. When constructing an index for a book, what is the usual arrangement of index entries?
a. Chronological order
b. Random order
c. Alphabetical order
d. Hierarchical order

6. Which term refers to the process of selecting representative sections of a document to create an abstract?
a. Paraphrasing
b. Summarizing
c. Indexing
d. Abstracting

7. What is the primary function of abstracting databases or services in the realm of information retrieval?
a. To provide a list of keywords for a document.
b. To offer a comprehensive summary of all documents.
c. To enable users to access the full text of the documents.
d. To assist users in locating relevant documents efficiently.

8. It is an abbreviated, accurate representation of the significant contents of a document accompanied by an adequate bibliographic description
a. Index
b. Abstract
c. Glossary
d. Bibliography

9. When constructing a subject index, what is the purpose of assigning appropriate descriptors or subject headings?
a. To ensure that the index is organized alphabetically.
b. To identify the author's preferred terminology for indexing.
c. To link the index to related terms found in the document.
d. To enhance retrieval by using controlled vocabulary.

10. What is the primary purpose of including an abstract in a research article?
a. To provide a detailed description of the research methods used.
b. To ensure the article is cited correctly in other publications.
c. To summarize the main points of the article for potential readers.
d. To showcase the author's expertise in the subject matter.

11. Which of the following is a crucial consideration when selecting keywords for indexing or abstracting?
a. Choosing keywords based on the document's length.
b. Using terms that are rarely used in academic literature.
c. Selecting keywords that are too broad in scope.
d. Using terms that accurately represent the document's content.

12. Which of the following is a common method used in keyword indexing to link related concepts?
    a. Using different colors for related terms.
    b. Adding parentheses around synonymous terms.
    c. Creating hyperlinks between entries.
    d. Using cross-references to other relevant terms.

13. Which type of index contains entries organized based on the occurrence of words found in the document?
    a. Author index
    b. Keyword index
    c. Subject index
    d. Citation index

14. Which approach to indexing uses a hierarchical structure to organize concepts from general to specific terms?
    a. Natural language indexing
    b. Keyword indexing
    c. Hierarchical indexing
    d. Faceted indexing

15. When constructing an abstract, what should be the usual length of the text to provide a concise summary?
    a. Less than 100 words
    b. 100 to 250 words
    c. 250 to 500 words
    d. More than 500 words

16. What is the primary role of a thesaurus in the indexing process?
    a. To provide a list of keywords for abstracting.
    b. To suggest related terms and synonyms for concepts.
    c. To determine the length of the abstract.
    d. To ensure the document adheres to a specific citation style.

17. Which type of index is organized based on the authors' names and the corresponding page numbers?
    a. Subject index
    b. Author index
    c. Keyword index
    d. Citation index

18. How can librarians assist users in effectively utilizing indexing and abstracting resources?
    a. By limiting access to only experienced researchers.
    b. By providing training on how to use the available resources.
    c. By promoting the use of physical indexes over digital databases.
    d. By discouraging the use of controlled vocabulary.

19. What is the key difference between indexing and abstracting?
    a. Indexing focuses on keywords, while abstracting focuses on subject analysis.
    b. Indexing provides a summary, while abstracting helps with information retrieval.
    c. Indexing is primarily for books, while abstracting is for journal articles.
    d. Indexing uses controlled vocabulary, while abstracting uses natural language.

20. Which type of abstract aims to provide a concise overview of the main points of a document?
    a. Indicative abstract
    b. Informative abstract
    c. Descriptive abstract
    d. Critical abstract

21. How do abstracts save the time of the reader?
    a. Abstract are usually shorter than the whole paper
    b. Abstract indicate the major content of the whole paper
    c. Abstract gave the subject coverage of the whole paper
    d. Abstract generally give useful information about the whole paper

22. The number one common sense criteria in evaluating an abstract is that it should
    a. Exclude unimportant information
    b. Represent what the item is all about
    c. Be error free
    d. Be brief and readable

23. Good quality abstract has the following characteristics
    a. Accuracy, originality, brevity
    b. Clarity, brevity, accuracy
    c. Acceptability, accuracy, brevity
    d. Relevance, clarity, accuracy

24. Verbose writing is a no-no in abstracting. Choose the more concise form for "in the shape of a rectangle"
    a. Shape
    b. Rectangle
    c. Rectangular
    d. Shapely

25. The following are considered document surrogates, except
    a. Annotation
    b. Extract
    c. Summary
    d. Keywords

26. Highly abbreviated statement that encapsulates the major points of a document.
    a. Terse Literature
    b. Extract
    c. Annotation
    d. Summary

27. An abstract that is written for a specific area of knowledge
    a. Discipline-oriented
    b. Finding-oriented
    c. Mission-oriented
    d. User-oriented

28. The nature of the study is allotted approximately ____of the abstract.
    a. 3%
    b. 7%
    c. 25%
    d. 70%

29. The methodology of the study is allotted approximately ____of the abstract.
    a. 3%
    b. 7%
    c. 15%
    d. 70%

30. Which of the following abstracting services include critical abstract?
    a. Mathematical Reviews
    b. Bulletin Signature
    c. Excerpta Medica
    d. Psychological Abstract

31. "Audible to the ear"
    a. Heard
    b. Ear
    c. Audible
    d. Hearable

32. This principle of abstracting stresses unnecessary redundancy and verbosity.
    a. Accuracy
    b. Clarity
    c. Brevity
    d. Consistency

33. The body of the abstract should be so organized to contain the following information in a prescribed sequence. Which of the following is the correct sequence.
    a. Objective, methodology, conclusions, results
    b. Purpose, methodology, results, conclusions
    c. Objective, purpose, methodology, results, conclusions
    d. Purpose, objective, methodology, conclusions, results

34. What is the final step in writing the abstract?
    a. Check the draft abstract
    b. Write the final abstract
    c. Edit and polish the abstract
    d. Follow the abstract format

35. This is a type of abstract that is evaluative and the abstractor expresses views on the quality of the work of the author and even makes comparison with the works of other authors.
    a. Slanted abstract
    b. Critical abstract
    c. Indicative abstract
    d. Informative abstract

36. This is the key unit in the reference of an abstract because it provides the location of the paper. It should be accurate and consistent and follows some standards conventions for citing.
    a. Funding agency
    b. Publication source
    c. Author affiliation
    d. Title

37. The physical carrier of organized information which may be print, non-print or electronic in format.
    a. Document
    b. Database
    c. Message
    d. Data

38. What should be done before doing the final step in writing the abstract?
    a. Check the draft abstract
    b. Write the final abstract
    c. Edit and polish the abstract
    d. Follow the abstract format

39. In reading the document to identify the key information, which parts of the document are deemed useful?
    a. Author's abstract
    b. Summary and conclusions
    c. Text
    d. All of the above

40. "Blue in color"
    a. Colored blue
    b. Color
    c. Blue
    d. Blue color

41. Sentences in abstracts must be
    a. Short and clear
    c. Short and declarative

b. Short and concise
d. Short and relevant

42. Which of the following examples do not illustrate verbosity?
a. In a slow manner
c. Cope with
b. Pair of Scissors
d. Past history

43. It is a systematic arrangement of entries designed to enable users to locate information in a document.
a. Abstract
c. Reference
b. Index
d. Glossary

44. The process of creating an index.
a. Referencing
c. Abstracting
b. Indexing
d. Cataloging

45. Person who does indexing.
a. Abstractor
c. Indexer
b. Publisher
d. Author

46. Raw word coming from the documents that are regarded as indexable term.
a. Keyword
c. index entry
b. Descriptor
d. identifier

47. The first type of book that was arranged in alphabetical order in 900 A.D.
a. Dictionary
c. almanac
b. Encyclopedia
d. thesaurus

48. Raw words coming from document.
a. Natural language
c. Keywords
b. Descriptors
d. Entry terms

49. Refers to the extent to which concepts or topics are made retrievable by means of index terms
a. Consistency
c. Specificity
b. Exhaustivity
d. Derived Indexing

50. A process of organizing a list of terms
a. Syntax
c. Semantic construction
b. Classifying
d. Vocabulary control

51. A controlled vocabulary used to describe a specific subject or field is called
a. LCSH
c. Thesaurus
b. Subject heading list
d. ERIC

52. Indexes in which coordination is executed by the indexers at the beginning stage
a. Permuted indexes
c. Chain indexes
b. Pre-coordinate indexes
d. Post-coordinated indexes

53. Which of the following is not included in indexing of periodicals and newspapers
a. Sports news
c. Headlines
b. Editorials
d. Ephemeral information

54. Terms that have been defined for use of thesaurus
a. Descriptors
c. Preferred terms
b. Identifiers
d. Keywords

55. This becomes a paramount challenge since each issue of a periodical may deal with correlated topics by several different authors, written in different styles, and aimed at different users.
a. Specificity
c. Interpretation
b. Exhaustivity
d. Consistency

56. These indexes are open-ended projects and usually done by a team of indexers.
a. Book indexes
c. Image indexes
b. Newspaper and periodical indexes
d. Post-coordinate indexes

57. A computer alone can determine relationships among words and concepts.
    a. True
    b. False

58. Which of the following is the primary objectives of indexing?
    a. Information storage
    b. To produce an index
    c. Information retrieval
    d. Resource sharing

59. Below is an example of what of abstract.
    "The octane number of benzene is 100."
    a. Informative
    b. Indicative
    c. Critical
    d. Indicative-Informative

60. "Airplanes" should be used as a replacement for "Boeing 747"
    a. True
    b. False

61. The term index came from the Latin word "indicare" which means
    a. To record
    b. Treasure
    c. To point out
    d. matching

62. It consist of a heading, usually a keyword or phrase to identify the subject, subheading, page number of a concept in a book index.
    a. Modification
    b. Locator
    c. Entry
    d. thesaurus

63. The type of index that needs a secondary file, an alphabetical list in order to identify the right position of the item in the list.
    a. Classified index
    b. Concordance
    c. Book index
    d. Faceted index

64. Is sometimes called back-of-the-book index.
    a. Periodical index
    b. Concordance
    c. Book index
    d. String index

65. This principle refers to the extent to which a concept or topic in a document is identified by a precise term in the hierarchy of its genus-species relationship.
    a. Exhaustivity
    b. Specificity
    c. Consistency
    d. Depth indexing

66. This refers to the study of meaning as expressed in communication such as words.
    a. Vocabulary
    b. Semantics
    c. Syntax
    d. Synonymy

67. BT and NT are used to indicate
    a. Synonymy
    b. Syntactic relationship
    c. Hierarchical relationship
    d. Associative relationship

68. A high degree exhaustivity will result to:
    a. High relevance but low recall
    b. High recall but low relevance
    c. High relevance and high recall
    d. Low relevance and low recall

69. This technique will draw the attention of the information seeker to other index terms related to his/her search.
    a. Use of *See also* reference
    b. Use of role indicators
    c. Use of *See* reference
    d. Use of syndetic device

70. A syndicate device that indicates that another terms is to be used in preference.
    a. BT
    b. UF
    c. USE
    d. RT

71. Which of the following controlled vocabulary tools would you use in indexing the journals in health sciences?
    a. LCSH
    b. MeSH
    c. ERIC
    d. Macrothesaurus

72. What filing arrangement is indicated by this group of worlds:
    Steamboat
    Steam engine
    Steam locomotive
    Steam shovel

    a. Alphabetical, word-by-word
    b. Alphabetical, letter-by-letter
    c. Classified
    d. Shunting

73. Which of the following is the correct entry for a personal name?
    a. Spencer, Diana
    b. Princess Diana
    c. Diana, Princess of Wales
    d. Lady Di

74. What is the correct form of entry for the name of St. Francis?
    a. Francis, Saint
    b. Francis of Assisi, Saint
    c. Saint Francis
    d. Saint Francis of Assisi

75. What should be the entry element of the corporate name listed below?
    a. Department of Agriculture
    b. DA
    c. Philippines. Department of Agriculture
    d. Republic of the Philippines. Department of Agriculture

76. The part of a document is considered as a basic indexing unit and is the first stop in determining subject content.
    a. Reference section
    b. Title
    c. Abstracts
    d. Table of contents

77. Which of the following is not a function of an index?
    a. Identifies potentially relevant information in a document
    b. Provides records of library holdings
    c. Analyzes concepts in a document
    d. Indicates relationship among concepts

78. Refers to the ratio of relevant documents retrieved to the total number of the relevant documents potentially available.
    a. Precision
    b. Relevance
    c. Recall
    d. Subject coverage

79. Which of the following pairs of words indicates genus/species relationship?
    a. Architects and architecture
    b. Computers and computer programs
    c. Universities and professors
    d. Wood products and lumber

80. What do you call a system whereby an indexing language is utilized to create index or other retrieval system?
    a. Abstracting System
    b. Cataloging System
    c. Classification system
    d. Indexing system

81. The following are the types of pre-coordinate indexes EXCEPT one.
    a. Book index
    b. Bibliographies
    c. Periodical index
    d. OPAC index

82. A back of the book index is an example of what type of indexing system?
    a. Permuted indexing
    b. Pre-coordinate indexing
    c. Post-coordinate indexing
    d. Title derivative indexing

83. Who conceptualized the Post-coordinate Indexing System?
    a. Melvil Dewey
    b. H.P. Luhn
    c. Mortimer Taube
    d. Soergel

84. When does the coordination of concepts in the Post-coordinate Indexing System occur?

a. Before the time of searching
b. During the indexing process
c. At the time of indexing
d. At the time of searching

85. What type of abstract is this
"*This article determined and reported the number of onions grown in California.*"
a. Indicative
B. Informative
c. Informative-Indicative
d. Critical

86. It is the study of complementary networks of hardware and software that people and organizations use to collect, filter, process, create and distribute data.

a. Indexing
b. Information system
c. Information Retrieval
d. Data Retrieval

87. This is used to give restriction on the use of the index terms, define the term, suggest other related terms, and at time, provides brief historical use of the terms.
a. Scope note
b. Quasi-synonyms
c. Index entry
d. Qualifier

88. These are raw facts, figures, values or instructions with no specific meaning by themselves.
a. Information
b. Data
c. meaning
d. input

89. Indexing system developed for the Modern Languages Association (MLA)
a. POPSI
b. NEPHIS
c. CIFT
d. PRECIS

90. Which of the following is not a STRING index?
a. KWIC
b. PRECIS
c. NEPHIS
d. CIFT

91. This refers to the exponential increase in information generation which was deemed uncontrollable unless information is properly organized for retrieval.
a. Information retrieval
b. Information explosion
c. Data storage
d. Database

92. A part of a document which serves as a key device in identifying information for retrieval and users will often depend on it for help them decide if the material is useful or not.
a. Author's name
b. Title
c. Name of publisher
d. Date of publication

93. A word and name index is also called
a. Back-of-book-index
b. Chain index
c. Concordance
d. PRECIS

94. Synonyms in a language are collection in
a. Dictionary
b. Thesaurus
c. Glossary
d. Authority file

95. This part of abstract facilitates the indexing process.
a. Body
b. Reference
c. Descriptors
d. Signature

100. A leading reference publisher specializing in indexes and abstracts.
a. H.W. Wilson
b. Barnes and Noble
c. EBSCO
d. R.R. Bowker

INDEXING AND ABSTRACTING
ADDITIONAL QUESTIONS

Multiple Choice: Select the best answer.

97. Which back-of-the-book index element directs a reader from a nonpreferred term to the preferred term?

A. A see reference.

B. A running head.

C. A colophon.

D. A shelf mark.

98. What is the main purpose of an informative abstract?

A. List only the author's credentials.

B. Reproduce the table of contents.

C. Evaluate the publisher's marketing.

D. Summarize a work's purpose, methods, results and conclusions.

99. In a controlled vocabulary, a broader-term relationship indicates that a term:

A. Must be used as the document title.

B. Has no semantic relation to other terms.

C. Represents a more general concept than the selected term.

D. Is always a spelling variant.

100. Which policy most directly improves consistency among indexers?

A. Index only the first page of each document.

B. A documented indexing manual with agreed rules and examples.

C. Allow every indexer to invent unrelated formats.

D. Remove all authority control.

Answer Key

97. A 98. D 99. C 100. B
